

AS A150 flush mounted seismic wall profile is designed to match perfectly with AS A250 floor model. It provides multi-directional movement at large openings and can be applied with many different types of finishes (granite, marble, ceramic etc.) up to 15 mm thickness. During the seismic based contractions, specially designed pop-up mechanism ascends the center plate without damaging the finished surface and gets back to origin after activity is over. Almost invisible profiles give a decorative aspect to the spaces with the continuous wall covering view.
